## Overview

ADOP offers a broad range of fiber patch cables for QSFP28 transceiver modules, including single-mode & multimode, simplex & duplex, UPC & APC, as well as multi-length options. We also provide custom service to cater to preference, and large stock is available for deliver in. □Quality Guarantee□High-performance polishing machine, and complemented by precision plates holders designed for MT ferrules, 3D interferometer provides verification of MTP/MPO polishing process, and making all parameters of hte polished MT ferrule complies and exceeds industry standards. Q: What. We're talking OM4 multimode fiber that can handle 40GB and even 100GB speeds, which is pretty much top of the line for most data centers or server rooms. The connectors are LC to LC (duplex style) with these zirconia ceramic ferrules that are super precise - they claim up to 500 insertions without. Single mode fiber optic cable is made up of a small diameter glass or plastic core surrounded by cladding, which is a layer of reflective material.
