

Andorra butterfly-shaped drop cable dual-core

Overview

Butterfly Drop Cable featuring central fiber core with dual side strength members and LSZH sheath. Perfect for FTTH drop wiring and indoor/outdoor telecom links. It introduces fiber optical cables from outdoors into indoors, or from the floors into the rooms, enabling the transmission of optical signals. It is mainly used as a fiber to the home (FTTH) and other fiber optic access (FTTx) network user introduction segment cabling cable for communication between indoor user access points and optical network terminals (ONTs). It can be used for laying in indoor environments such as vertical shafts. Drop cable plays a pivotal role in indoor wiring, providing a direct connection from the telecommunication network to the end-users. Understanding its structure is crucial to ensure optimal performance. High Bandwidth and Performance: Low-bend-sensitivity fiber ensures excellent data transmission with minimal signal.
