

Are 96-core fiber optic connector assemblies waterproof

Overview

Rated IP68 for protection from dust and water up to 1. Their defining feature is the mechanical sealing system surrounding the connector interface, which isolates the ferrule, adapter sleeve, and mating zone. The N600H-0096-4's IP68 rating means the enclosure is 100% protected against dust and able to endure immersion in 1.5 meters of water for up to 60 minutes with no damage or decline in performance. Integrated cable. It's designed to be waterproof and dustproof, making it ideal for outdoor use—whether aerial, pole-mounted, wall-mounted, duct, or buried. The unique dual-dome design simplifies installation and maintenance. They are applicable to situations such as overhead, man-well of pipeline. Ensure a minimum IP65 rating for dust and water resistance; IP68 is preferred for direct burial. Confirm the closure is rated for the intended temperature range, typically -40°C to +85°C.
