

Bbu optical module cannot be removed

Overview

First, identify the faulty BBU, either A or B, in Unisphere. Once identified, remove the BBU from the base module by pushing the orange release tab to the right while holding the BBU's handle. Carefully place the removed BBU on a clean, static-free surface to avoid any potential. This section describes how to replace a BBU. If the BBU you want to replace is located on a controller that is running services, ensure that the average CPU usage of each controller does not exceed 40%. During power-on, you need to check the status of the LEDs on the BBU3900. Check. To replace a Battery Backup Unit (BBU) in an EMC VNX5200, VNX5400, VNX5600, or VNX5800, follow these steps. SFP unavailable module alarm clear method. more How to clear Unavailable Optical Module Alarm | SFP Module Alarm | ZTE BBU. This alarm is reported when the link between the BBU and the lower-level RF units malfunctions.

Article Content

0xF0D20004 BBU Module Is Removed

Procedure Reinsert the BBU module. If the alarm persists=> Step2. Collect related information and contact technical support engineers. Favorite Download Update Date 2024-12-09 Document

Hier sollte eine Beschreibung angezeigt werden, diese Seite lässt dies jedoch nicht zu.

0xF00D20014 BBU Module Cannot Be Monitored

This document is applicable to OceanStor 2810 V5. This document describes the basic knowledge about the events of storage system in terms of event definition, event level, impact on the system, possible

BBU replacement using Technician Advisor Utility

Remove Bezel: If present, remove the BBU bezel. Power Down (if necessary): If the BBU is still powered on, disconnect its power cable and press the power button to shut it down.

Huawei Technical Support

This page provides information on BBU failure or lifespan expiration and related technical support by Huawei.

Which Optical Modules Are Commonly Used In 4G Base

In this blog, ETU-LINK will talk about 4G base stations and common types of optical modules. The base station can be divided into two modules: the RRU for

How to clear Unavailable Optical Module Alarm | SFP Module Alarm

How to clear Unavailable Optical Module Alarm | SFP Module Alarm | ZTE BBU Current Alarms In this video you can learn that How to clear Unavailable Optical Module Alarm.

Replacing a VNX BBU (Battery Backup Unit) – EMC

First, identify the faulty BBU, either A or B, in Unisphere. Once identified, remove the BBU from the base module by pushing the orange release tab to the right while

BBU Optical Module Transmit/Receive Fault

After combining the RRU log analysis and the alarm of the optical module, the radio frequency maintenance link is triggered by the power-off of the RRU board, as shown in the following screenshot.

Replacing a Faulty BBU

Precautions The duration from the time when a BBU is removed to the time when a BBU is inserted into the system subrack cannot exceed five minutes. Otherwise, the heat dissipation of the storage

Replacing a BBU

Remove the cables from the interface modules on the controller where the BBU to be replaced resides. Press the latches on the controller to release the handles and unlock the controller in the direction of

HUAWEI BBU3900 HARDWARE MAINTENANCE

BBU3900 Hardware Maintenance Guide 5 Replacing Components of the BBU3900
Figure 5-21 Disconnecting cables **WARNING** Do not look into the optical module

BBU instruction FINAL 30W digi

BBU should be kept away from liquids and damp areas. It's very important to keep your devices dry, without the possibility of liquid spilling onto or into them. Please do not use flammable substances on

Replacing a BBU

Remove only one controller at a time during BBU replacement. A controller must be reinstalled within 3 minutes after removal to avoid impact on system heat dissipation.

Huawei Base Station Knowledge Base & FAQ-Huawei

The BBU generated 2 alarms due the RF unit restart. 1. BBU Optical Module Transmit/Receive Fault2. RF Unit Maintenance Link Failure Some BTSs reset when XPU boards are switched over

0xF0D20004 BBU Module Is Removed

This document is applicable to OceanStor 2810 V5. This document describes the basic knowledge about the events of storage system in terms of event definition, event level, impact on the system, possible

BBU module faulty and unable to up after replace

Customer asked: After BBU replaced, the fount panel still have indicator showing, is there are normal behavior? --- Yes its normal, as the BBU is in charging state and the indicator light is normal.

HUAWEI BBU3900 HARDWARE MAINTENANCE

During power-on, you need to check the status of the LEDs on the BBU3900. As for the power-off, the operation in a normal situation and that in an emergency are

Replacing a BBU

Remove and install a BBU and its owning controller with even force. Excessive force may damage the appearance or connectors of the BBU. Remove only one controller at a time during BBU

How To Clear RF Unit CPRI Interface Error | Huawei BBU

Possible Causes If the optical transmission is used, the optical module or connector of the RF unit or peer device may be improperly installed, or the optical link is faulty.

RRU & BBU Fiber Cable Installation Guide | PDF

RRU-BBU Optical Fiber Cable Distribution Guide (GCUW) - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online. This document

HISILICON Optical Modules in the field of communication base stations

In 4G network, the optical modules used to connect bbu and rru are mainly Gigabit to 10 Gigabit optical modules; in 5G network, the interfaces between bbu and rru are such as cpri

How To Clear RF Unit CPRI Interface Error | Huawei BBU

RF Unit Optical Module or Electrical Port Not Ready RF Unit Optical Module Transmit/Receive Fault RF Unit Optical Module Fault RF Unit Optical Module Type Mismatch Inter-BBU Optical Module Fault ...

LTE Service Affecting Alarm

This alarm is reported when the optical module on the port of the BBU connecting to the lower-level RF units or the CPRI electrical cable is not in position. This alarm is reported when the 12 V DC output of

Replacing a BBU (OceanProtect X9000)

Remove only one BBU at a time. After the newly installed BBU is fully charged (that is, the Running/Alarm indicator of the BBU is steady green), replace another one.

Battery Backup Information

Use a screwdriver to remove the screw securing the access panel. Press the lever on the right side of the Battery Backup Unit (BBU) door. The door swings open
