

Cable tray crossover line

Overview

Horizontal Crosses are the perfect solution for connecting four straight channel sections or other transitional fittings, forming a four-way intersection with two exits in any fiber routing system. Standard 12", 24" and 36" radius are available for all fittings. Standard Cross: W1 =. Our cable tray design considerations guide details key factors to consider when designing cable tray systems for industrial and commercial applications. Materials and finishes available are mild steel pre galvanised as standard with mild steel hot dip galvanised after manufacture and stainless steel grade. Fittings, cable trays, universal - Cross-overs, universal. Patton & Cooke offer CX Series crossovers for light duty applications and the variable length Fat Mat series crossovers. In a well-planned Cable Management system, cables often need to cross paths—but that doesn't mean they should tangle or interfere.
