

Can the XFP optical module have a serial interface

Overview

In addition, XFP provides a two-wire serial interface, XFP can achieve data diagnostics, real-time monitoring of various parameters of the optical module, such as temperature, laser bias current, send optical power, receive optical power, operating voltage. Digital diagnostics functions are available via a 2-wire serial interface, as specified in the XFP MSA. With these features, this 10G SFP+ transceiver is ideal for data centers, 10G fibre channel, legacy FDDI multimode links, etc. All Extreme Networks XFP modules comply with. A serializer/deserializer is often used to convert between XFI and a wider interface such as XAUI that has four lanes running at 3.125 Gbit/s using 8B/10B encoding. Module. SFP is the abbreviation of SMALL FORM PLUGGABLE, which can be simply understood as the upgraded version of GBIC. The negative edge clocks data 20 from the XFP transceiver.
