

Distribution box protection color

Overview

Choose light-colored finishes for your distribution box. Light colors bounce sunlight away, keep the box cooler, and help it last longer. The IEC 60446 standard, "Basic and Safety Principles for Man-Machine Interface, Marking, and Identification," establishes global guidelines for identifying electrical equipment terminals, conductors, and wiring colors. When they fail, everything goes dark. Today, we'll explore how international standards translate into practical protection through rigorous testing methodologies that simulate the harshest conditions on earth. Check and take care of your distribution. We can provide customization options in the design details, including product color, product material, opening position and so on. All circuits, raceways, and conduits shall be color-coded, labeled, and sized to match the appropriate t Colo er drawings. If the conduit size is not given on the drawings, the conduit shall be sized in accordance with NEC based on the number of conductors enclosed plus a parity-sized. EKDB10 plastic waterproof distribution boxes are made of the highest quality plastic materials and are available in ABS and PC.
