

Elevator pre-installed electrical distribution box

Overview

Specially developed for elevator systems, this electrical distribution panel combines safety, compact design, and high efficiency. Additionally, they're designed to meet UL 67 and NEMA PB1 standards for use in data centers, industrial, commercial and healthcare facilities. Manufactured from 1 mm DKP. The Mitsubishi Elevator Power Box X59LX-81 is a foundational energy distribution component exclusively engineered for Mitsubishi elevator systems—essential for commercial high-rises, residential complexes, public transit facilities, and office buildings worldwide. While using drawout switchgear with power air circuit breakers remains a highly reliable solution, requests for drawout molded case circuit breakers (MCCBs) have increased. From power and signal distribution to I&C applications and complete room. The utility model is suitable for the technical field of distribution boxes and provides an elevator distribution box, which comprises a box body, a power supply and a power supply control module, wherein the box body is provided with a plurality of power supply ports; the mounting assembly is.
