

Estonia ONU Optical Network Unit 200G

Overview

Equipped with 1 PON, 4 GE, 1 USB 2. Support PPPoE/Static IP/DHCP, multicast IGMPv2 proxy/snooping, IPv4&IPv6. Wide range working temperature (0 °C - 40 °C) and humidity (5% - 95%). Discover our selection of GPON, EPON, and XG (S)PON ONT/ONU devices. A gigabit passive optical network (G-PON) comprises optical line terminals (OLTs) and optical network units (ONUs), and Murata's lineup of products for use in ONUs is introduced here. Grandway ONU has a wide range of products, providing the final optical and electrical conversion from optical fiber to home, with strong working performance and stability. They support TR-069 and provide excellent compatibility with third-party OLT systems. How is an ONU powered?

ONUs, or Optical Network Units, are powered through a technology known as Power. We propose a novel, to our knowledge, bidirectional TFDM 200-Gb/s coherent PON architecture based on the digital subcarrier multiplexing (DSCM) technology. A polarization-insensitive simplified coherent receiver is achieved at the ONU side by Alamouti coding and heterodyne detection.
