

Exfo Fiber Optic Cable Certification

Overview

EXFO's iCERT capability, part of its iOLM software platform, speeds and eases fiber certification for singlemode and multimode links. The ECC program is designed to train contractors on key technical aspects of fiber-optic networks. The ECC program offers training sessions that will provide you with the expertise needed to. The MAX-945 Fiber Certifier provides a foolproof method against test cord reference mistakes and negative loss thanks to its step-by-step wizard that guides technicians along the referencing and the verification process, as per industry standards. The MAX-940/945 Fiber Certification Device is the perfect. Nicolas Cole, Data Center Solution Manager for EXFO, explains why certifying fiber-optic cabling is vital for fast, reliable data transmission in today's highly competitive context. In an industry where service quality and coverage are pivotal, operators run the constant risk of customer churn if. The iCERT capability for singlemode and multimode fiber, part of EXFO's iOLM application for OTDRs, automatically conducts fiber certification to industry pass/fail thresholds. This greatly simplifies the evaluation of.

Article Content

iCert – Fiber Optic Cable Certification Made Easy

iCERT turns the iOLM into a Tier-2 certifier with automated pass/fail thresholds for singlemode and multimode cables. Certify any enterprise or data center network as per international standards (TIA-568, ISO 11801).
