

Fiber optic cable should be reserved

Overview

Having reserve cable ready when it's needed is much more cost effective than adding cable and splices later. With slack in place beforehand, additions and moves can be accomplished without service disruptions. The Fiber Optic Association, Inc. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. Fiber optic cables represent a significant capital investment in telecommunications infrastructure, and their performance depends heavily on how they are stored before deployment. You should pull on the fiber cable strength members only! Never exceed the maximum pulling load rating. Following the right storage practices is essential to keep your fiber optic cables in. Fiber optic "cable" refers to the complete assembly of fibers, other internal parts like buffer tubes, ripcords, stiffeners, strength members all included inside an outer protective covering called the jacket.
