

Hooked Optical Cable

Overview

Optical attached cable (OPAC) is a type of fibre-optic cable that is installed by being attached to a host conductor along overhead power lines. The attachment system varies and can include wrapping, lashing or clipping the fibre-optic cable to the host. Installation is typically performed using a specialised piece of equipment that travels along the host conductor from pole to pole or tower to tower. EtymologyThe generic (IEC) and designation for attached cable is "OPAC". OPAC can be used in the same sense as the nomenclature "OPGW" and "ADSS". OPAC refers specifically to wrapped optical fibre cable technology was developed independently in the UK and Japan in the early 1980s. In the UK, Raychem Ltd had a background in resistance to There are three basic technology requirements for a wrapped cable system – a fibre optic with suitable performance for installation on an overhead power-line; a device for carrying out the wrapping operation (.
