

House electrical control box light is on red

Overview

The red light warns you that the breaker turned off to protect your system. Overloaded outlets, broken wires, or bad devices might be the cause. But if it trips again, call an electrician. Seeing a red indicator light on a breaker can be alarming, but this light is a sophisticated diagnostic tool designed to communicate the exact nature of the electrical fault. Understanding what this light signifies is the first step toward safely restoring power and identifying the root problem in. One of the breakers in the breaker box turns red when I switch it on. Some of my bathroom outlets do not work. This breaker is currently off, but when I turn it on, it shows a red light. Aside from that, some circuit breakers also convey a red light. The lights flicker, the microwave dies mid-popcorn, and suddenly you're standing in front of that mysterious metal box in your utility room, wondering what to do.
