

How to dissolve outdoor fiber optic cables

Overview

With a lint-free wipe dipped in 99% reagent-grade alcohol, gently wipe the surface area of the ferrule and fiber tip and immediately wipe them dry with another dry lint-free wipe. You may optionally use a can of compressed air to finish the process. Step 1: Mark the armor (if the cable has armor) with the tip of your knife to note a length sufficient to expose the cable's ripcord, being careful not to go through the armor and cut the ripcords. In our continuing discussion of installing FO cables, let's use a step-by-step approach in detailing how to strip and clean indoor and. Terminating fiber optic cables essentially means putting connectors on fiber optic cable so that you can connect the cable to various devices or network components. When users complain of connection issues or signal dropouts, follow this simple checklist: □ Step 1: Remember that you have two eyes and observe. After you have prepared the end of the cable you may begin to mix the epoxy resin and hardener together and load it into a syringe, unless of course you are using pre-loaded epoxy syringes, which are premixed and.
