

Imported Industrial Switches OSFP

Overview

Amphenol Communications Solutions' OSFP series interconnect system has 60 contacts per port with a 0.6 mm contact pitch and eight high speed channels. The Octal Small Form Factor Pluggable (OSFP) Connector System provides up to 224Gbps PAM-4 per lane, single- or dual-port, 8- or 16-lane connectivity. These input/output (I/O) solutions support aggregate data rates up to 1.6Tbps, helping data centers meet AI-driven capacity demands with minimal. Amphenol's ExtremePort™ OSFP connector and cage family delivers a scalable, high-performance interconnect platform designed for next-generation data centers, high-density switch/router systems, and high-speed serial infrastructures. This Amphenol Commercial interconnect. This specification defines the electrical connectors, electrical signals and power supplies, mechanical and thermal requirements of the OSFP Module, connector and cage systems.
