

Intelligent Data Center Rack Structure

Overview

The average AI rack will cost \$3.9 million in 2025, compared to \$500,000 for traditional server racks.¹ That sevenfold cost increase reflects the fundamental transformation in rack requirements as GPUs crossing the 1,000-watt threshold push rack power densities beyond. The average AI rack will cost \$3. Power distribution architecture supports 2N, DR, and BR. Imagine the Advantages of an Intelligent, Integrated Infrastructure that Delivers the Capabilities You Need to Achieve Your IT Objectives What Makes These Solutions Unique?

yyMaximize space utilization – footprint savings up to 40% compared to a conventional data center design yyAvoid costly. Schneider Electric, the leader in the digital transformation of energy management and automation, today announced new data center solutions specifically engineered to meet the intensive demands of next-generation AI cluster architectures. Evolving its EcoStruxure™ Data Center Solutions portfolio. Racks once served as inert structures that merely held servers, switches, and cables in predictable arrangements. This innovative design enables easy configuration and maintenance.
