

Jamaican stainless steel cable tray support

Overview

These tray systems allow excellent ventilation and prevent sagging while routing. They support up to 280 lbs. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. Enhanced safety and reduced hazards. Common cable tray fittings include cable tray elbows, tees, crosses, bends, risers. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. HDT steel cable tray, for heavy duty job, comes in standard height of 50 and 100mm. HDmann. Make a Payment We provide High Quality Products & excellent customer service to our clients.
