

Modbus power distribution box

Overview

Modbus RTU and power distribution boxes simplify wiring. All devices are connected via RJ45 connectors to minimise wiring errors. For larger networks, repeaters can be used to reinforce the communication and to make longer network. This page contains technical data sheet, documents library and links to offering related to this product. Small Equipment (No External Dimension More Than 50 cm) Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. 990NAD23000 - IP20 Modbus Plus junction box with line terminal - Modbus Plus network. It can monitor the power data including voltage, current, frequency, apparent power, active power, reactive power, power factor, power consumption, load percentage, breaker On/Off state, temperature.
