The OM5 fiber Patch Cord LC to LC is ideal for data center, housing, education, LAN, SAN, commercial applications in data, video . CFOFC offers a full range of multimode optic fibers designed for LANs, data centers, enterprise networks, and short-distance, high-bandwidth transmission. Corning® ClearCurve® OM5 wide band optical. To recap Optical Fiber can be divided into Multimode Fiber (MMF) and Single-Mode optical fiber (SMF). Multimode Fiber (MMF) has a core diameter, typically 50–100 micrometers, has ability to transfer multiple modes of light through the fiber core, uses lower-cost electronics (LED, VCSEL) operates at. OM4 and OM5 multimode fibers are excellent choices for modern data centers supporting 40G, 100G, and even 400G Ethernet, while OS2 single-mode fiber provides the longest reach and highest bandwidth for long-distance applications.
