

Optical cable external strand

Overview

Outside Plant cable (OSP) Fiber Optic Cable is Fiber Optic Cable that is installed outside of a plant, or building. OSP Fiber differs from normal Fiber Optic Cables in that they are designed to withstand the installation and stresses inherent in cables exposed to the external. Fiber optic cables for outdoor applications are engineered to withstand the more demanding conditions seen outside, from environmental extremes to mechanical forces. These are the outdoor fiber optic cables you see strung along telephone poles (aerial), installed inside an underground duct, or even. CommScope designs and manufactures a comprehensive line of fiber optic cables—from outside plant to indoor/outdoor and fire-rated indoor fiber cables. They effectively. Belden's extensive line of indoor and outdoor cable products is offered in tight buffer and loose tube designs. Armored, burial, and ruggedized designs are suited to a host of industrial environments. It affects performance, maintenance, cost, and reliability.
