

Papua New Guinea Export Optical Transceiver Module 10G

Overview

The SFP+ transceivers are high performance, cost effective modules supporting data rate of 10Gbps and 20km transmission distance with SMF. The transceiver consists of three sections: a FP laser transmitter, a PIN photodiode integrated with a trans?

impedance preamplifier (TIA) and MCU. The optical transceiver market in Papua New Guinea is witnessing substantial growth, driven by the demand for high-speed data transmission and communication networks. This. The Juniper Networks C38 SFPP-10G-DW38-I 10G SFP+ transceiver supports up to 40km link lengths over single-mode fiber (SMF) via an LC duplex connector. This transceiver is compliant with SFF-8431 and SFF-8432 MSA standards. Digital diagnostics functions are available via a 2-wire serial interface. Discover the Dell Compatible 10G SFP+ BiDi Transceiver with 1490nm TX / 1550nm RX, 100km reach, LC SMF, and DOM for long-distance, high-performance networking.
