

# Price list for laying optical cables in high-altitude areas

## Overview

Materials: standard cable and duct. Total: around \$22,000-\$35,000 per km. Spec: mixed aerial and underground sections, higher fiber count. With 19+ years of experience installing fiber-optic cables at over 20,000 locations, we've seen how prices vary based on cable type, project scope, and installation complexity.

Commercial. Buying fiber optic installation services involves several cost components, with total price influenced by length, location, and access. The main cost drivers include trenching or aerial deployment, materials, labor hours, and any required permits. In contrast to "classic" civil engineering, in which an open trench is dug and the pipes are laid at least one meter deep, alternative laying techniques require less depth – and ideally almost no large. Getting accurate cost estimates is crucial for winning fiber installation bids. This breakdown gives you real numbers to build better estimates.
