

Revit cable tray skew elbow

Overview

The workaround to the problem above, is to first place a cable tray fitting at the correct elevation, even before drawing the cable tray route. Rotating the cable tray elbow will allow you to then specify the orientation. Here is the simple solution Create two type : 90 elbow and 45 elbow In the real world, to make a 45 elbow, we need two segments, to make a 90 elbow, we need three segments I've also tried to use some geometry forms in revit but no hope. 11-09-2024 01:19 AM Thank you, anyway I will mark your. The Niedax Cable Tray is an extremely versatile and cost effective solution for your cabling needs. You can select from a wide rang of tray sizes, fittings and accessories in various material thicknesses and finishes. I have attached a few pictures with examples. Your assistance. Sample code submitted by Gavin_WS in the Revit API discussion forum thread on Get "Failed to insert elbow" when calling NewElbowFitting for cabletray.
