

SCC Junction Box Sealing Method

Overview

Polyethylene tape is the most common option for waterproofing a junction box. Using smart junction boxes equipped with adaptable universal I/O systems provides efficiency and great savings. For this to work, flexible cable seals allowing a high number of cables to be routed through a limited area are required. Important features of a smart cable seal include area efficiency. When Marcus, the maintenance supervisor at a petrochemical facility in Houston, discovered water damage in 15 junction boxes after a heavy storm, he realized that “waterproof” doesn't always mean water-tight. The \$50,000 repair bill and 48-hour production shutdown could have been prevented with.
