

Spacing of cable trays in Sri Lanka

Overview

When installing two cable trays in parallel at the same height, the distance between them should be no less than 0. This spacing is crucial for adequate maintenance access, ease of inspection, and ensuring proper airflow for effective heat dissipation. Our trays are strong and durable with easy installation. We provide a variety of cable trays and accessories, including electro galvanized, hot dip galvanized, steel, aluzinc, and aluminum alloy options. This article provides an in-depth. Sale!
