

Standard for Temporary Power Distribution Boxes in Engineering Projects

Overview

Now approved, the 'Safety Technical Standard for Temporary Electrical Use at Construction and Municipal Engineering Sites' is established as an industry standard, numbered JGJ/T46-2024, to be implemented starting January 1, 2025. The IET's Guide to Temporary Electrical Systems has finally arrived after undergoing a long-awaited update. OSHA's construction wiring rules recognize the importance of safe temporary wiring methods and protective measures, and OSHA also explains that GFCIs are fast-acting devices intended to shut off power quickly in ground-fault conditions. The main revisions include: expanding the "grounding and lightning protection" chapter to "distribution system", adding special provisions for residual current protection, refining the technical requirements for wire rope wiring, and supplementing the. work requires electrical power for many purposes. They define a minimum baseline of quality and workmanship for installing electrical products and systems. NEIS® are intended to be referenced in contract ntractors Association assumes no obligation or liability to.
