

Swedish optical transceiver module 200G

Overview

6T-FR8 OSFP224 Optical Transceiver Module, utilizing silicon photonics and EML, features 8 channels of 200G-PAM4 for parallel electrical and optical transmission. It supports up to 2km reach over single-mode fiber, operates within a 0°C-70°C case temperature range, and complies with IEEE. Use Juniper's portfolio of 2 x 100G optical transceivers to service point-to-point 200G interconnections or breakout to interoperate with widely deployed legacy four-wavelength 100G interfaces. Our 2 x 100G modules use Duplex CS connectors, boasting a 40 percent size reduction from Duplex LC. They. 200G Transceivers by JTOPTICS deliver high-speed optical data transmission and are ideal for data centers, enterprise networks, and telecom applications. Designed in compact form factors such as QSFP56 and QSFP-DD, these transceivers support 200G. 200G QSFP-DD/QSFP56 optical transceiver is a key component in modern networking infrastructure, enabling the seamless transmission of large volumes of data at incredibly fast speeds.
