

Terminal distribution box with 50 circuits

Overview

The Main Terminal Box (MTB) is utilized to distribute 20 to 50 AMP branch circuits from the panel to remote locations by means of multi-circuit Home Run ® or Super Neutral ® cable. Provides the contractor greater cable management by running multiple Hotel, Motel and. Schneider Electric NSYEBs are enclosed IEC power distribution blocks that are available with copper or aluminum lugs. They are one-pole modular units with an interlocking dovetail feature that enables ganging of the blocks to create multi-pole configurations according to application requirements. Base: grey, Housing: white 10 pairs connection module. A distribution box, sometimes referred to as a panel board, distribution board, or breaker panel, is an essential part of electrical systems that makes it easier to distribute electricity throughout a structure.
