

The opening for the electrical distribution box was made too large

Overview

If you have enough slack behind the ears, you can hot glue a piece of lattice wider than the hole up behind the hole to the correct size, install the box to where the ears grab the wall and the lattice, then fill the hole with plaster. Here's what they look like: In both cases, the ears of the boxes have no issue making contact with the back of the drywall. Is the best opinion here to expand the drywall around the edges of the.
