

The procurement of network security equipment should be undertaken by the relevant authority organization

Overview

The European Union Agency for Network and Information Security (ENISA) is a centre of network and information security expertise for the EU, its member states, the private sector and Europe's citizens. The security of network equipment is critical to the security of any network. ENISA works with these groups to develop advice and recommendations on good practice in. For the implementation of EBRD-financed projects in both the public and private sectors, EBRD clients may need to procure goods, works, and services, as well as consultancy services. The Plans for new and updated guidance page will tell you about which guidance will be updated and when this will happen. Carry out information and cyber security risk. The United Nations Financial Regulations and Rules, as promulgated by Secretary-General's Bulletin ST/SGB/2013/4 dated 1 July 2013, govern the procurement functions of the United Nations with the Delegation of authority in the administration of the Staff Regulations and Rules and the Financial.
