

Tonga fiber optic cable splicing

Overview

The Tongatapu end of Tonga's international fibre optic cable was being pulled up today for splicing and is expected to come online by late tomorrow, Tuesday, 38 days after a large section was blown to bits by a volcanic eruption on Jan. Tonga signed a 15-year deal to secure satellite connectivity following an earlier cable break in 2019 from a ship's anchor. Some people have reported they can only dial out - and not receive calls. It has cable landing points at Sopo, a suburb of Nuku'alofa in Tonga, and Suva, Fiji. As fiber optic connections become increasingly mainstream, the need to connect fiber optic cables to one another — or splicing — is also on the rise. In this guide, we cover the basics of fiber optic splicing, how to perform splicing using two different methods, and finally some best practices to. The Tonga-Fiji Submarine Cable System (also known as Tonga Cable) is a 827km fiber optic submarine cable system linking Nuku'alofa, Tonga and Suva, Fiji, and connects to the Southern Cross Cable Network at the Suva Cable Landing Station in Fiji.
