

What types of head does the large square pigtail fiber have

Overview

The large square head joint is the SC type joint, and its outer casing is rectangular, and the structural dimensions of the pins and coupling sleeves used are exactly the same as those of the small square head (FC type). A fiber optic pigtail is a short length of optical fiber —typically 0.5m to 2m—that has a factory-terminated connector on one end and bare fiber on the other end. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a.
